WASHINGTON NEWSLETTER

By Sen. George Smathers

WASHINGTON — I was asked the other day if the Senate is doing anything these days besides staging the McCarthy-Army hearing, and whether or not more important issues are before the nation.

Of course, this was a rhetorical question and the answer is obvious.

It is unfortunate that the hearings have degenerated into a spectacle and that so much time is being consumed in efforts to determine who is lying — Stevens or McCarthy — over charges and denials that special privileges have been given to a private in the Army. While most of the press, radio and television facets of the good portion of the Senate, not to mention the Army "brass," and the attention of millions of Americans are centered on this matter, there are occasions when the public is being almost unnoticed which may determine the future course, and even the very security of our nation. It may be that we are guilty of "fiddling while Rome burns," as it has been the nation's attention to other vital matters.

AID TO HANDICAPPED: It was my honor the other day to visit the Parade of Progress

Exposition and to receive a citation for aid to the physically handicapped.

From its organization as "Independence, Incorporated,"

which was organized in 1946,

and has been interested in this work, all Florida can take

pride that last year we placed more than 30,000 physically handicapped persons in useful and gainful employment in our state.

In Miami alone, the committee under direction of Chairman Lee Axrod found jobs for 5,000.

BY SCHATZI

The end, I fear, has come. My little stronghold of silence, the basket on the porch, where I can lie and think beautiful thoughts, has been invaded by Sound.

Sound is something I find people mostly can't live without.

Whereas in the days of my ancestors in the Barbarian forests, the sound of a log or a log home was the snapping of a log fire or the pages of a book being turned, now silence is the exception, and Sound is the rule.

I never object when the people repeat and repeat a thousand of Sound fills our living room. Music is a Sound we dogs are fond of, if we can pick it out.

The Sounds in the office did however like little radio playing, the presses running, the doors slamming. So I simply moved permanently out of the office and do most of my work at home.

But then this week another birthday came along at our house, and GUESS what arrived?

Yep. Sound. A new radio. And it's clickin' it.

WITH an automatic turnoff and turnon, so one goes to sleep in Sound and wakes to Sound.

WITH a plug-in attachment so that the danged thing will start the coffee percolating in the morning.

As I said, the end may well have come.

Or I can always get back at the bosses by buying a little television set of my own.

It is with a sense of deep appreciation to the voters of Palm Beach County that I wish to say to those who elected me to the School Board:

"MANY, MANY THANKS"

As I said during the campaign, my belief in the constant need for improvement in the education field was my principal reason for running for this office. I assume the responsibility given me by the voters with awareness of the job ahead, and with considerable pride in their support.

We Owe It To Our Children

before we cast our vote for
Florida's next Governor
to decide this question!

with which candidate will
future progress of Florida's
schools be assured?

What counts is not the promises the candidates make in an election year but what their present records prove they will do!

YOU EXAMINE THE RECORDS . . . YOU BE THE JUDGE

1937—When Florida was suffering from a severe teacher shortage because working conditions compared unfavorably with those in other states, LeRoy Collins led in setting up a state-wide retirement system for teachers.

1939—LeRoy Collins sponsored Florida's first code to modernize our school system and to protect teachers from political interference. LeRoy Collins sponsored legislation to provide education for children with emotional problems.

1939, 1941, 1943, 1951—LeRoy Collins sponsored legislation for additional funds for new buildings at our State universities.

1941—LeRoy Collins sponsored legislation to provide special educational facilities for physically handicapped children.

1947—LeRoy Collins led in setting up the Minimum Foundation Program, providing good schools, teachers, and school buses for all children in all counties. It is this program that materially elevated the overall standard of Florida's schools, and attracted favorable

national interest. Charley Jones has the "distinction" of being the only member of the legislature who voted against the Minimum Foundation Program.

1949—LeRoy Collins supported a desirable amendment to the Minimum Foundation Program, increasing the State's share of financing the program, so as to provide equal educational opportunity for our children.

1951—LeRoy Collins initiated the constitutional amendment which provided funds for new school buildings in every county. He also sponsored an increased appropriation for the Minimum Foundation Program, and legislation for broader representation on the State Board of Control.

1953—LeRoy Collins successfully led the fight for a raise for the teachers, and sponsored appropriations for county libraries and for driver education in Florida schools. He also supported an increase in teacher-training scholarships.

The proof of LeRoy Collins' great record of service to our schools is in these expressions from those closest to Florida's schools...

Letter from the President of the Florida Education Association to Senator Collins.

"Johns, with the privilege of a few words as Chairman of the Florida Education Association, as hard-working, underpaid public servants, we thank you for your leadership. The Governorship, only rose to take a bow, but he stole the show. Applause from the teachers and students of Florida goes to Senator Collins for his leadership and his insistence for the teachers to stand up a second time for another battle."

Miami Herald, April 2, 1954

Statement from the President of Florida School Board Association.

"We have found that for 18 years Senator Collins has been one of the staunchest supporters of the schools in the state. He has done so many things for the schools that I cannot attempt to enumerate. You know."
